## Abstract of the Disclosure

1		2		3	
Brain central nerve		Medulla oblongata blood vessel center		Lower part center of thalamus	
4		5		6	
Cardiac muscle excitement and transmission		Heart beat strong or weak		Heart rhythm quick or slow	
7		8		9	
Heart output		Blood vessel tensiity		Blood vessel resistance	
10		11		12	
Blood vessel elasticity		Blood pressure big o small		Blood vessel wall elasticity	
13		14		15	
Blood flow and change		Blood flow speed		Blood rate of flow	
16		17		18	
Blood viscosity		Blood ingredient		Blood platelet agglutination	
19		20		21	
Blood coagulation speed		Micro circulation index		Blood platelet agglutination	
22		23		24	
Internal secretion system functional state		Sympathetic nerve blood vessel tension		Para-sympathetic nerve blood vessel diastole	

**Conclusion:** The main elements affecting wrist radius artery are blood viscosity and blood speed rate blood viscosity decides blood flowing speed and state.

(attached table 3)

## Abstract of the Disclosure

A <sub>1</sub>	Unstable pulse	B <sub>1</sub>	Heavy pulse	C <sub>1</sub>	Retarded pulse
The main constituting condition is that the pulse position is shallow		The main constituting condition is that the pulse position is deep.		The main constituting condition is that the pulse's counting number is lower than normal frequency	
D <sub>1</sub>	Quick pulse	E <sub>1</sub>	Smooth pulse	F <sub>1</sub>	Weak pulse
The main constituting condition is that the pulse's counting number is faster than normal frequency.		The main constituting condition is that the pulse's fluency is smoother than normal state.		The main constituting condition is that the pulse is retarded, big, empty and soft.	
G <sub>1</sub>	Real pulse	H <sub>1</sub>	Thin pulse	I <sub>1</sub>	Slight pulse
The main constituting condition is that the pulse is big, long and slightly strong.		The main constituting condition is that the pulse is smaller than normal ones.		The main constituting condition is that the pulse is slender and soft.	
J <sub>1</sub>	Full pulse	K <sub>1</sub>	String pulse	L <sub>1</sub>	Linger pulse
The main constituting condition is that the pulse should be a little bigger.		The main constituting condition is that the pulse's tension increases.		The main constituting condition is that the pulse is floating, thin, soft and lack strength.	
M <sub>1</sub>	Feeble pulse	N <sub>1</sub>	Tight pulse	O <sub>1</sub>	Slow pulse
The main constituting condition is that the pulse is heavy, thin, soft and lack strength.		The main constituting condition is that the pulse is taut and hurry.		The main constituting condition is that the pulse's tension and elasticity are inferior.	
P <sub>1</sub>	Short pulse	Q <sub>1</sub>	Hidden pulse	R <sub>1</sub>	Uneven pulse
The main constituting condition is that the pulse stops at intervals.		The main constituting condition is that the pulse runs stealthily and stops sometime		The main constituting condition is that the pulse's fluency is not normal.	

(attached table 4)

a <sub>1</sub> unstable pulse analyse	① arthrosis sore and swelling ② catch a cold, headache and nose stuffy	b <sub>1</sub> heavy pulse analyse	① be vexed and irritable ② have pains in the waist and back, feel sore when stretching back	c <sub>1</sub> retarded pulse analyse	① urinate with white and turbid ② stomach cold, no appetite, swallow sore ③ sputum resistance and accumulation
---------------------------------------	--	------------------------------------	---	---------------------------------------	--

## Abstract of the Disclosure

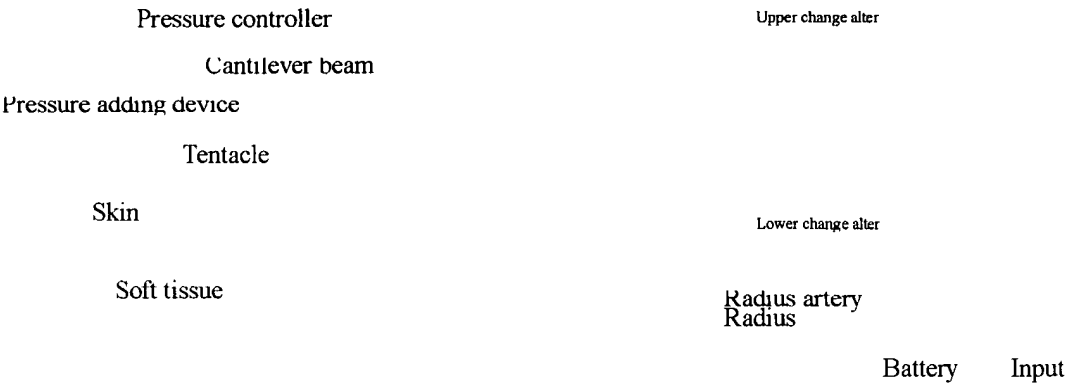

③cough with more sputum ④abdomen full with no appetite⑤ abdominal distension ⑥ urinate with no fluency, stool uneven		③feel sore in chest ④cough and astma ⑤urinate turbid and repeated ⑥full of biter, swallow sore		④in low spirit ⑤ waist and feet heavy, like wearing thick cloth ⑥abdominal distension and soring	
d <sub>1</sub> quick pulse analyse	①stomach vexed and vomit ② swallow sore, cough, mouth and tongue grow boils	e <sub>1</sub> smooth pulse analyse	① vomit, can't eat ② female menstruation is not smooth, male hematuria	f <sub>1</sub> weak pulse analyse	① dimsight ② abdominal distension, food hard of digestion ③ palpitation sweaty, breath hard
③be vexed and head ache ④urinate yellow and red, stool uneven⑤ eye-red, hot tempered ⑥ tearing, tinnitus, left cheekbone becomes red. (Liver inflammation)		③ halitosis, old food is difficult of digestion ④ head dizzy, palpitation, breath hard, insomnia, dreamy⑤ the upper part of the side of the human body distension or sore be perturbed, irritable ⑥ asthma with more sputum		④tinnitus, chest stuffy⑤ have pains in waist and legs, legs failure ⑥ emission, premature ejaculation, irregularity of menstruation	
g <sub>1</sub> real pulse analyse	①fever in chest ② food in stomach is hard of digestion	h <sub>1</sub> thin pulse analyse	① Fevering and vomiting ② insomnia, cough	i <sub>1</sub> slight pulse analyse	① anaemia ② night sweat ③ feeble sweat, pant
③sore and dry throat, cough, pant with more phlegm ④ be perturbed, irritable, headache and dizzy ⑤ urinate aching and repeated ⑥stool dry and hard		③stomach vacant and abdomen full ④ anaemia ⑤ diarrhea, emission ⑥ palpitation		④ nervous and palpitation ⑤ abdominal distension and stomach cold ⑥cold feeling and scour	
j <sub>1</sub> full pulse analyse	①abdominal distension and the upper part of the side of the human body is full and soreing② red eye、mouth boils and headache, beporturbed	k <sub>1</sub> string pulse	① have acute sore ② stomachache ③ abdominal sore	l <sub>1</sub> linger pulse analyse	①different to pass water② irritable, night sweater, pant
③spit sticky, dry throat ④ cough, astma, sputum more, throat sore⑤ urinate is red and uneven⑥ have sore and pain in the legs and feet		④headaching with more phlegm⑤ chest stuffy, cough and pant⑥ palpitation, night sweater		③weak and faded, spiritual lax④ forgetful, palpitation⑤ stomach soreing and distension digesting slowly⑥ viscous shit	
m <sub>1</sub> weak pulse analyse	①stomach full, abdominal distention ② night sweat, palpitation	n <sub>1</sub> tight pulse analyse	① hemiaache ② abdominal ache ③ headache, sore sight nose stuffy, nape strong	o <sub>1</sub> slow pulse analyse	①head dizzy② abdominal distension, can't eat ③ palpitation and forgettable④ have acute pain in nape and back
③ body ache and pant ④ palpitation forgettable⑤ have sore and pains in lions and legs, emission and premature ejaculation⑥ insomnia with more dreams		④ uomit and dyspepsia caused by excessive eating or improper diet⑤ have a acute sore in abdomen⑥ vib sore and distension		⑤stomach cold an diarrhea, have sore and cold in part of abdomia ⑥ urinate frequency, emission	
p <sub>1</sub> short pulse analyse	① cough, phlegm gush ② after eating, vomitting	q <sub>1</sub> hidden pulse analyse	①abdomen ache② out of one's mind ③ headache and dizzy chest stuffy, palpitation, pant	r <sub>1</sub> uneven pulse analyse	① sweaty, urinate passing water② pant, not at easy③ sweaty palpitation
③ head dizzy ④ emission ⑤ stomach distension and aching⑥ bevexed, not and dry		④stomach distension, full not to eat⑤ cough, chest stuffy⑥ wistache, abdomen distension		④eat nothing, vomit⑤ vib diatension, vibfull, bodyache⑥ motion hard and dry
